General Algebra 2 Worksheet \#10 Unit 11 page 1

1. $\$ 400$ is invested in an account paying interest at an annual rate of $4 \%$ compounded monthly. Express the balance of the account, $A$, as a function of the time, $t$, in years. Graph this function for values of $\mathbf{t}$ from $\mathbf{0}$ to $\mathbf{3 0}$ years. Label your graph with its equation.
function: $\qquad$
2. $\$ 1,500$ is invested in an account paying interest at an annual rate of $\mathbf{1 . 5 \%}$ compounded quarterly. Express the balance of the account, A, as a function of the time, $t$, in years. Graph this function for values of $\mathbf{t}$ from $\mathbf{0}$ to $\mathbf{3 0}$ years. Label your graph with its equation.

## General Algebra 2 Worksheet \#10 Unit 11 page 2

3. $\$ 300$ is invested in an account paying interest at an annual rate of $8 \%$ compounded continuously. Express the balance of the account, $A$, as a function of the time, $t$, in years. Graph this function for values of $\mathbf{t}$ from $\mathbf{0}$ to 30 years.
function: $\qquad$
4. $\$ 1,200$ is invested in an account paying interest at an annual rate of $\mathbf{2 . 5 \%}$ compounded continuously. Express the balance of the account, $A$, as a function of the time, $t$, in years. Graph this function for values of $\mathbf{t}$ from $\mathbf{0}$ to 30 years.

## General Algebra 2 Worksheet \#10 Unit 11 page 3

5. A certain radioactive substance with a mass of $\mathbf{2 5 0 0}$ grams has a half-life of $\mathbf{1 5}$ years. Express its mass, $Q$, as a function of time, $t$, in years. Graph this function for values of $t$ from 0 to 30 years. Label your graph with its equation.
function:
