## Precalculus Worksheet \#3 Unit 8 page 1

Find two set of polar coordinates ( $\mathrm{r}, \theta$ ) for each of the following points. You are given the Cartesian (rectangular) coordinates of the point ( $\mathbf{x}, \mathbf{y}$ ). Express $\theta$ in degrees where $\mathbf{0} \leq \theta<\mathbf{3 6 0}{ }^{\circ}$. Where appropriate, round to three significant digits. Show your work.
